

NT LBP R290 OPERATING ENVELOPE EXTENSION

1. General

Use of liquid cooled condensers is growing in light commercial segment appliances. To meet this growing requirement, Embraco has verified reliability of compressors belonging to **NT** family designed for **LBP** (low back pressure), in order to extend its operating envelope for lower condensing temperatures when used with propane refrigerant **R290**.

2. Declaration

Based on the positive results of reliability tests, **Embraco allows** to extend operating envelope condensing temperature limit from 35 °C **to 10 °C for NT LBP R290 models**.
