GA Global Presence

GA Innovation Drivers

Energy efficiency

Technology that enables **reduction of energy** consumption.

Low noise

Low noise in motors and compressors is key to **keep the consumer experience positive**.

Natural Refrigerants

Portfolio designed to deliver the **best in class performance**, under the safest conditions with natural refrigerants.

Electronics

Design and production of inverters, controllers and EC fans **for better performance and optimized total cost of ownership**.

Miniaturization

Size reduction combined with **embedded technology**.

Motors

Integrated Motors & Drives with Synchronous Technology

GA Research & Development

We are differentiated by a **deep expertise in Research & Development**, capable of **delivering technology and innovation** that anticipates trends.

Robust structure for innovation

with 9 Research & Development Centers

Partnerships with Universities

in different regions of the world

Local engineering support teams

with labs and application engineers available worldwide

+500 valid patents and +4,800 in the history

Innovation is a continuous process

The Right Solution For Each Customer's Need

We are differentiated by our **co-development** methodology with customers, which means:

- **Cost savings and improvements** in the customer's production line.
- **Working closely with customers** in the product development process to **provide proposals** with high added value.
- Formulate the **best solution** for each of our customers' products.

Products For Washing Machines

Washing machine motors in all types of technologies

Our range of motors for washers covers the requirements for all regions and types of appliances.

Available also as IMAC (Integrated Motor and Control).

Made in Slovakia

New: Sync It All portfolio

No one controls Embraco better than Embraco

Embraco Sync

It works **connected to You Control** and **manages the whole system** for an **optimized performance**.

Variable Speed

The compressor **saves energy by adapting** its rotation speed to the cooling demand

Optimized performance, less energy consumption and set up time reduction from weeks to days.

Embraco AIR

With an electronic motor, the fan is **energy efficient** and works with **single, multi or variable speed**.

The exclusive design allows **flexible assembly and fixation**.

YouControl

An easy interface that allows **you** to define the system's parameters, with an automatic tuning feature.
